Green Circle
Bespoke glazing

Like our premium Bi-Fold and Sliding Doors, our Premium Casement Windows are built to withstand the worst of the Great British weather. Designed to complement the other products in our range - these stylish windows can be manufactured to create large span atrium and apex windows as well as conventional casements.

Our Premium Casement Windows come with many benefits

Slim Sight Lines

Window frames are manufactured from slim-line aluminium profile which is both strong and lightweight in construction

Modern Design

Elegant square or chamfered profiles deliver a stylish and contemporary look

Wide Range of Finishes

Choose from a number of textured finishes in our hard-wearing 'Sensations' range, or any finish from the RAL colour palette. In single or dual colour

Increased Storm Protection

Ideal solution in areas exposed to heavy wind, rain and saline air. All of which can destroy traditional timber framed windows

Built-in Security

So you and your family can sleep soundly - All of our windows can be PAS 24 security certified*

Building Control

Our range of aluminium casement windows are fully compliant with Doc L of the building regulations

Weather Tightness

In weather tests our casement windows surpassed many of our competitors and remained watertight under air pressure four times the required industry standard (BS 6375)

*Windows must be specified as Doc Q compliant to meet PAS 24 standards

The windows are top quality, were fitted perfectly and look fantastic - respect to Green Circle

Kate & Mike Brampton, Ugborough

I would like to say a big thank you to all at Green Circle, I have over 35 years' experience in the construction industry and the aluminium windows you provide are the best I have come across.

Jerry McDonagh, Trevone
