Premium Bi-Folding Doors

Like many of our clients, we appreciate that Bi-Folding doors located in wet and windy environments need to be manufactured to withstand the worst that mother-nature can throw at them. That's why we put so much time and effort into ensuring every bi-fold we make is of the absolute highest standard.

Our bi-folding doors come with many benefits:

Slim Sight Lines

Green Circle's Premium Bi-Folding Doors are manufactured from slimline, thermally efficient aluminium profile which is both strong and lightweight in construction.

Effortless Opening

Door panels open in a concertina effect, with panels effortlessly folding and sliding to the left or right, allowing total access between internal and external spaces and providing a completely uninterrupted view.

Continuous Clean Lines

We can specify odd or even number configurations without an external handle. This keeps external frame lines clean & continuous, as well as improving weather protection and security.

Single Access Door

Odd number configurations can be specified with a single access door, providing normal day-to-day access without the need to open the whole system.

Building Control

Our range of aluminium Bi-folding doors are fully compliant with Doc L of the Building Regulations.

Weather Tightness

In weather tests our bi-folding doors surpassed many of our competitors and remained watertight under air pressure more than three times the required industry standard (BS6375).

Green Circle are conscientious, reliable and represent good value in the long term. For these reasons I chose them without hesitation when building my own home.

Andy Coughlan MCSD MCIAT,
Cogi Design - Architecture and Interiors.

TECHNICAL INFORMATION

- System U-Value **1.5 W/m²K**
- Weathertightness: **E750 (750 Pascals)**
- Resistance to Wind Load: **A4 (1800 Pascals)**
- Minimum Sash Width **700mm**
- Maximum Sash Width **1000mm**
- Maximum Sash Height **2500mm**
